

Day 1 Practice Sheet — Excel Formulas & IF Function

Module: Excel for Data Analysis — Formulas & IF

Prepared By: Mr. Akarsh/Dr. Ravneet Kaur

Objective: Practise SUM, AVERAGE, COUNT, COUNTA, MIN, MAX, IF and nested IF on a sales dataset.

SAMPLE DATASET

Use the sample data table below for all questions. The table shows Order ID, Salesperson, City, Product, Quantity, Unit Price, and Total Sales.

Order ID	Salesperson	City	Product	Quantity	Unit Price	Total Sales
ORD-001	Amit Sharma	Delhi	Laptop	2	45000	
ORD-002	Priya Singh	Mumbai	Mobile	5	18000	
ORD-003	Rahul Verma	Chennai	Tablet	3	22000	
ORD-004	Neha Gupta	Pune	Laptop	1	45000	
ORD-005	Amit Sharma	Delhi	Mobile	4	18000	
ORD-006	Priya Singh	Mumbai	Laptop	2	45000	
ORD-007	Rohit Jain	Jaipur	Tablet	6	22000	
ORD-008	Neha Gupta	Pune	Mobile	3	18000	
ORD-009	Rahul Verma	Chennai	Laptop	1	45000	
ORD-010	Rohit Jain	Jaipur	Mobile	2	18000	

PRACTICE QUESTIONS

Question	Task Description	Your Answer / Code
Q1 [SUM]	In cell G2, write a formula to calculate Total Sales for ORD-001. Copy it down to G11. Total Sales = Quantity × Unit Price.	=E2*F2
Q2 [SUM]	In a new cell below the table, calculate the Grand Total of all sales using SUM.	=SUM(G2:G11)
Q3 [AVERAGE]	Calculate the Average Order Value across all 10 orders using AVERAGE on the Total Sales column.	=AVERAGE(G2:G11)
Q4 [COUNT/COUNTA]	Use COUNT on the Quantity column. Then use COUNTA on the Salesperson column. Are the results the same? Why?	=COUNT(E2:E11) and =COUNTA(B2:B11), Yes the results are the same. Because both columns have exactly 10 rows filled up and no empty cells.
Q5 [MIN/MAX]	Find the Minimum and Maximum values in the Unit Price column.	=MIN(F2:F11) =MAX(F2:F11)
Q6 [MIN/MAX]	Which order had the highest Total Sales? Write MAX and note the Order ID manually.	=MAX(G2:G11) , Max = 132,000 , Order ID = ORD-007
Q7 [IF]	In a new column called 'Performance', write an IF formula: if Total Sales > 80000 then 'High', else 'Low'.	=IF(G2>80000,"High","Low")
Q8 [IF]	In a new column called 'City Category', write IF: if City = 'Delhi' or 'Mumbai' then 'Metro' else 'Non-Metro'. Hint: use IF with OR().	=IF(OR(C2="Delhi", C2="Mumbai"), "Metro", "Non-Metro")
Q9 [Nested IF]	In a new column called 'Commission Rate', write a nested IF: Total Sales > 100000 → 10%; Total Sales > 50000 → 7%; else 5%.	=IF(G2>100000, 10%, IF(G2>50000, 7%, 5%))
Q10 [Nested IF]	Add a column 'Commission Amount' = Total Sales × Commission Rate. Then use SUM to find total commission payout.	Commission Amount: =G2*I2 Total Payout: =SUM(J2:J11)
BONUS	Highlight all cells in 'Performance' column where value is 'High' using Conditional Formatting (Home → Conditional Formatting → Highlight Cells).	=H2="High" Range : =\$H\$2:\$H\$11
